

Griffin Non-Clog Pumps

Ready To Tackle The Toughest Applications and Assure Critical, High Volume Pumping Capacity

Featuring a non-clog impeller capable of handling stringy materials and solids up to 4 1/2" and a large clean out port for hassle-free removal of large debris over 4 1/2" without removing suction pipe or hose.

These pumps are capable of delivering flow over 17,000 gpm and head capacities of 240 ft. or more. Griffin non-clog pumps are an ideal solution for sewer bypasses, flood control, sumping, or any other application requiring high volume and the ability to move trash laden effluent.

Over 85 Years of Providing Pumps You Can Trust.
